

MODULOFLEX

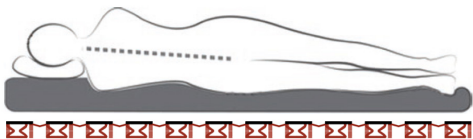

Innovative bedding system
for boats and recreational vehicles

■ AN INSTANTLY ENHANCED COMFORT

MODULOFLEX improves comfort significantly into boats, caravans, motor homes and truck cabins.

Our **MULTI POD TECHNOLOGY** offers a maximal point elasticity. It guarantees a permanent adaptation to movements and an optimal body support whilst sleeping.

DIFFERENT COMFORT ZONES can be easily generated by adding extra suspensions under each plate.

This system offers a **CONTINUOUS, PLANE** and **WITHOUT HARD CENTRAL LINE** support area for the mattress.

■ LIGHT AND COMPACT

Designed to respond to the specific requirements of boats and leisure vehicles, the components are extremely **LOW WEIGHT** (approx. 1,7 kg/m²).

The **LOW HEIGHT** of this system (47 mm) allows an optimal suspension in limited spaces.

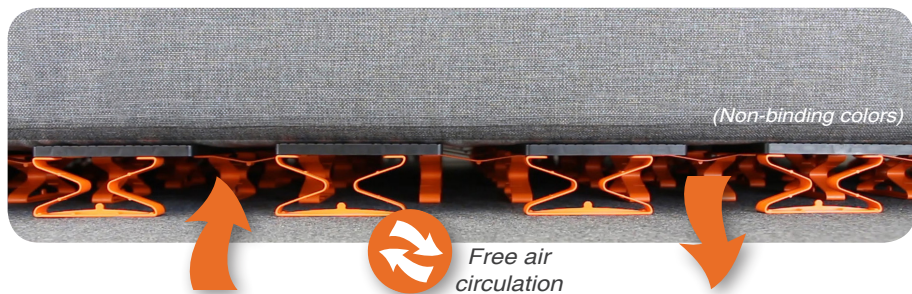

MODULOFLEX is easily inserted under your mattress for a much better comfort

■ EASY TO INSTALL

As the different elements are simply clipped together, the assembling of this system requires no particular tooling.

We provide assembling instructions and custom made plans.

■ A «TAYLOR MADE» CONCEPT

CUSTOMISABLE thanks to its multiple clipping positions, MODULOFLEX can be adjusted to any bed shape.

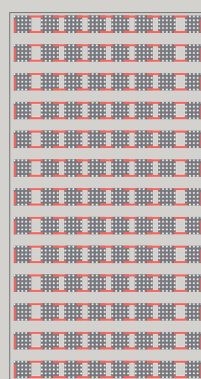

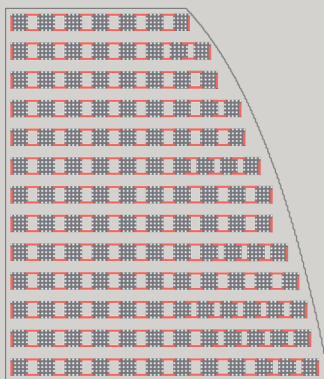

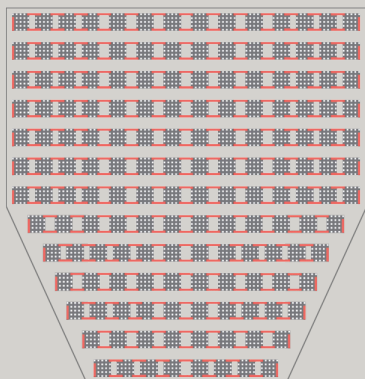

For series projects, our positioning software optimizes the spread out of the springs and we deliver a ready assembled product.

■ VENTILATION AND HYGIENE

MODULOFLEX is **AN INNOVATIVE BEDDING SYSTEM** which creates **VENTILATION** between the mattress and the support.

This ventilation space protects the cushions from humidity and mould.

All materials included in MODULOFLEX bedding system are non-magnetic, stainless and recyclable.

■ COMPONENTS

MODULOFLEX can be delivered :

- in bulk
- as a kit
- pre-mounted for large series orders

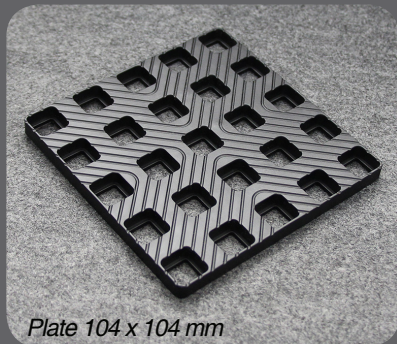

Plate 104 x 104 mm

Suspension

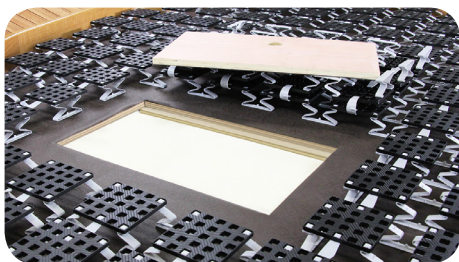

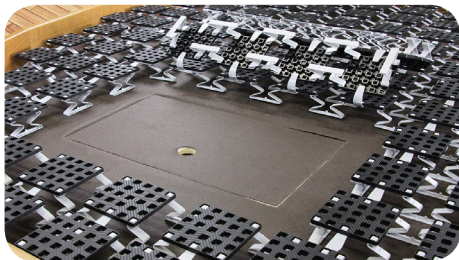

Connection part

Locking part

Disassembling tool

■ EASY ACCESS TO STORAGE

■ FASTENING
